

CODE TEST

Interaction Designer

Web Page

Overview

This code test is meant to test your HTML5/CSS3/jQuery code writing ability. We will be evaluating your problem solving approach to basic page design and the interactions listed below. We are looking for basic, clean and sophisticated treatments that will make the page come to life.

Clean design. Clean code.

Interaction

As you build the page please focus on the following interactions:

- Image slideshow/rotation in the main banner
- Dropdown of main nav and sub category rollover
- Video (pull source code from trainingpeaks.com)
- Rollover functionality of grey box headers

Requirements

- Use HTML5/CSS3/jQuery
- Pick a standard font which matches the design
- Put completed project on a test URL where we can check it and also provide us with link to the project archive with all files (zip, rar, ...).

JS Functionality

- Image slideshow/rotation

Supported Browsers

Ensure that the page works in the latest versions of the following browsers:

- Firefox
- Google Chrome
- Safari
- Internet Explorer
